Profile

Having previously lived in Italy for 13 years and Dubai for 4, I now live in Bracknell since 2014 where I feel that I have well-integrated into British culture.

I consider myself to be an open-minded and multicultural person. My background has taught me to understand diverse perspectives and celebrate cultural multiformity in my communities. That being so, I'm excited to work as a part of a diverse team of programmers and creatives.

Best project

- [Into The Perish](#)

Third year Project
VR game
First person shooter, roguelike
